SYJC FIRST TERM END EXAMINATION 2017

Duration: 3 Hrs.   SUBJECT: MATHEMATICS & STATISTICS   Marks: 80

Note : (i)   All questions are compulsory.
(ii)   Figures to the right indicate full marks.
(iii)   Answer to every question must be written on a new page.
(iv)   L.P.P. problem should be solved on a graph paper.
(v)   Log table will be provided on request .
(vi)   Write answers of section –I and Section – II in separate answer book.

SECTION – I

Q. 1.   **Attempt ANY SIX of the following :**   (12)

(i)   In a firm the cost function for output x is given as $C = \dfrac{x^3}{3} - 20x^2 + 70x$ Find marginal cost at $x = 20$.

(ii)   Express the following statement in symbolic form and write its truth value.
"If 4 is an odd number, then 6 is divisible by 3"

(iii)   Find $\dfrac{dy}{dx}$ if $y = \sin^{-1}\left(\sqrt{x}\right)$

(iv)   If $A = \begin{bmatrix} 1 & 2 & 3 \\ 2 & a & 2 \\ 5 & 7 & 3 \end{bmatrix}$ is a singular matrix , find the value of 'a'.

(v)   Find $\dfrac{dy}{dx}$ if $y = (\tan x)^{\sin x}$

(vi)   Find the value of x and y if $x\begin{bmatrix} 2 \\ 3 \end{bmatrix} + y\begin{bmatrix} -1 \\ 1 \end{bmatrix} = \begin{bmatrix} 10 \\ 5 \end{bmatrix}$

(vii)   If the average revenue R_A is 50 and elasticity of demand η is 5, find marginal revenue R_m.

(viii)   Show that the function $f(x) = x^3 + 9x + 8$ is always increasing.

Q. 2.   **(A)**   **Attempt ANY TWO of the following**   (6)
(i)   Write the truth value of the negation of the following statement
a) The Sun sets in the East.
b) $\cos^2\theta + \sin^2\theta = 1,\ for\ all\ \theta \in R$
c) The square every real number is positive

(ii)   If $x^y = e^{x-y}$ then show that $\dfrac{dy}{dx} = \dfrac{\log x}{(1 + \log x)^2}$.

(iii)   Find A^{-1} by Adjoint method $A = \begin{bmatrix} 1 & 2 & 3 \\ -1 & 1 & 2 \\ 1 & 2 & 4 \end{bmatrix}$

(B)   **Attempt ANY TWO of the following**   (8)
(i)   Determine whether the following statement patterns are tautologies, contradictions or contingencies
$(p \to q) \wedge (p \wedge \sim q)$

(ii)   In a factory for production of Q articles, standing charges are Rs. 500, labour charges are Rs. 700 and processing charge are 50Q. The price of an article is 1700-3Q. For what value of Q, the profit is maximum ?

(iii)   If $x^n . y^n = (x + y)^{n+n}$ show that $\dfrac{dy}{dx} = \dfrac{y}{x}$

Q. 3.   **(A)**   **Attempt ANY TWO of the following**   (6)
(i)   The cost of producing Q items is given as, $C = Q^3 - 600Q^2 + 1200Q$ .for what value of Q the average cost is decreasing?

1

(ii) Express the truth of each of the following statement by Venn diagrams.
   a) No circles are polygons.
   b) All teachers are scholars and scholars are teachers.
   c) Some hardworking students are obedient.

(iii) If the demand function is $D = \dfrac{p+6}{p-3}$, find the elasticity of demand at p=2.

(8)

(B) **Attempt ANY TWO of the following**

(i) If $x = a(\theta + \sin\theta)$, $y = a(1 - \cos\theta)$ show that $\dfrac{dy}{dx} - \tan\left(\dfrac{\theta}{2}\right) = 0$

(ii) Express the following equation in the matrix form and solve them by method of reduction:
   $2x - y + z = 1$, $x + 2y + 3z = 8$, $3x + y - 4z = 1$

(iii) The expenditure E_c of a person with income I is given by $E_c = (0.000035)I^2 + (0.045)I$. Find Marginal Propensity to consume (MPC), and Marginal Propensity save (MPS) when I=5000. Also find APC and APS.

SECTION – II

(12)

Q. 4. Attempt ANY SIX of the following :

(i) Find the solution set and graphical solution of the inequation $|2y - 5| < 9$

(ii) A job production unit has four jobs A, B, C, D which can be manufactured on each of the four machines P,Q,R and S. The processing cost of each job for machine is given below.

Jobs	Processing Cost (Rs) Machines			
	P	Q	R	S
A	31	25	33	29
B	25	24	23	21
C	19	21	23	24
D	38	36	34	40

How should the jobs be assignment to machines so that the total producing cost is minimum ?

(iii) Find the solution set for inequation $5y - 7 < 3y + 9$. Also draw on the real line.

(iv) Five jobs are performed first on machine X and then on machine Y. The time taken in hours by job on each machine is given below. Determine the optimal sequence of jobs.

Jobs	A	B	C	D	E
Machine X	6	2	10	4	11
Machine Y	3	7	8	9	5

(v) Find x, if the C. D. R. (crude death rate) = 13.4 per thousand, for the following data :

Age Group	Population	No. of death
0 – 20	40,000	350
20 – 60	65,000	650
60 - Above	15,000	x

(vi) Compute C.D.R. (crude death rate) of a city with total number of deaths 812 in a year out of total annual population 80,000 .

(vii) Compute T_{40}, given that $e^0_{40} = 31, l_{40} = 550$.

(viii) Find the age standard death rate (S.D.R.) for the following data :

Age groups (In years)	Population	No. of deaths
0-10	11000	240
10-20	12000	150
20-60	9000	125
60 & above	2000	90

2

Q. 5. **(A)** **Attempt ANY TWO of the following** (6)

(i) Obtain crude death rate (C.D.R.) for city A and B from the data given below :

Age Group	City A		City B	
(in years)	Population	No. of deaths	Population	No. of deaths
Below 15	800	32	900	12
15-25	3000	12	1500	8
25-65	4800	48	4500	38
65 and above	1400	42	600	30

(ii) There are 5 jobs each of the which is to be processed through three machine A, B and C in order A B C. Processing time in hours are as shown in the following table :

Jobs	1	2	3	4	5
A	3	8	7	5	4
B	4	5	1	2	3
C	7	9	5	6	10

Determine the optimum sequence for the five jobs and the minimum elapsed time .

(iii) Solve the following maximal assignment problem :

Branch Manager	Monthly Business(Rs lakh)			
	A	B	C	D
P	11	11	9	9
Q	13	16	11	10
R	12	17	13	8
S	16	14	16	12

(B) **Attempt ANY TWO of the following** (8)

(i) Solve the liner programming problem by graphically method.

Maximize $z = 5x + 3y$

Subject to:

$$x + y \leq 4$$
$$3x + 8y \leq 24$$
$$5x + 3y \leq 18 ,$$
$$x, y \geq 0$$

(ii) Determine l_{92}, l_{93}, l_{94} given that

$$l_{91} = 97, d_{91} = 38, \ q_{92} = \frac{27}{59}, P_{93} = \frac{15}{32}$$

(iii) Find the sequence that minimizes the total time required in performing the following jobs on the 3 machines in the order CBA. Also find the total elapsed time and idling time for each of the machines.

Jobs	1	2	3	4	5	6
Machine A	8	3	7	2	5	1
Machine B	3	4	5	2	1	6
Machine C	8	7	6	9	10	9

6. **(A)** **Attempt ANY TWO of the following** (6)

(i) Solve the following minimal Assignment problem.

Jobs	Machines			
	A	B	C	D
I	12	1	11	5
II	3	11	10	8
III	3	4	6	1

(ii) Fill in the blanks which are marked with a question mark in the following extract from a life table:

x	l_x	d_x	q_x	p_x
		?	?	?
20	88230	?	?	------
21	79473	-----	------	

(iii) Five jobs are performed first on machine X and then on machine Y. The time taken in hours by job on each machine is given below.

Jobs	A	B	C	D	E
Machine X	6	2	10	4	11
Machine Y	3	7	8	9	5

Determine the optimal sequence of jobs that minimized the total elapsed time to complete the Jobs.

(8)

(B) Attempt ANY TWO of the following

(i) Given the following table which relates to the number of parrots at age x, complete the life table for parrots.

x	0	1	2	3	4	5
l_x	1000	940	780	590	25	0

(ii) A company has one surplus car each in cities P, Q, R, and S and one deficit car each in cities A, B, C, and D. the distance in kilo meter between the cities are shown.

Cities	Distances (Kms.)			
	A	B	C	D
P	8	5	8	2
Q	9	3	6	9
R	4	10	7	4
S	3	5	6	1

The management wishes to determine the assignment of surplus car to the cities with a deficit to minimise the total kilo metres travelled. Gives alternate optional assignment if possible compute the total distance for optimum assignment?

(iii) A person makes two types of gift items A and B requiring the service of a cutter and a finisher. Gift item A requires 4 hours of cutter time and 2 hours of finishers time. Gift item B requires 2 hours of cutters time and 4 hours of finishers time. The cutter and finishers have 208 hours and 152 hours available time respectively every month. The profit on one gift item of type A is Rs. 75 and on the gift item of type B Rs.125. Assuming that the person can sell all the gift items produced. By using L.P.P. method determine how many gift items of each type should he make every month to obtain the best returns?

PRAHLADRAI DALMIA LIONS COLLEGE OF COMMERCE & ECONOMICS
SYJC FIRST TERM END EXAMINATION 2017

Duration: 3 Hrs.   **SUBJECT: ENGLISH**   **Marks: 80**

SECTION A
(Reading Skill, Grammar, Note Making and Summary)

Q.1. (A) Read the following passage and answer the questions given below: (11)

There are some glimmers of hope. I met up young Navdeep Ahuja who along with another colleague began the innocuously named Graduate's Welfare Association, Fazilka. They are bringing about change with the mandate of citizens participation in governance and are facilitating the creation of physical and social infrastructure across 22 cities in Punjab. They have put in place a network of cycle rickshaws called Ecocabs which can be booked through a mobile phone. They are also developing car free zones, food and culture street in these cities. All this is being is done very efficiently and at a low cost. We need many such organizations.

However, my ideal of a city in 2020 is not a utopian dream. It is achievable. It has street where people walk on wide footpaths shaded by leafy trees. Streets are usually one third of a city 's area and its most democratic segment. Public space dedicated to pedestrians reduces inequality and should be accorded priority when developing cities.

Adjoining the street should be cycle lanes where bicycles and rickshaws can sail past smoothly. It will have a great public transport system with buses, metro and taxis. Parking will be difficult and expensive so people will use public transport rather than cars. There will be parks and gardens and the air will be clean, as pollution levels will have dropped dramatically.

And then, cities will become areas of graceful living and a charmed way of life.

1. What is the passage about? 1
2. What according to the writer, is achievable and why? 2
3. What is the glimmer of hope? 2
4. What facilities according to you, do the Indian cities need? 2
5. Do as directed:
   i) Streets are usually city's most democratic segment. (Change the degree) 1
   ii) Cities will become areas of graceful living. (Make the sentence less certain) 1
   iii) The air will be clean as the pollution level will have dropped automatically. (Use Unless)1

iii) " Can you suggest me a good hotel?" Mr. Shah asked the taxi driver. "Yes, I will. It's very close to the railway station," said the taxi driver. (Change it into Indirect speech) 2

Q.2.(A) Read the following extract and answer the questions given below: (11)

So today in one month India sells four times as many phones as the entire country possessed three decades go. Attitudes have also changed from that of the old communication minister to today's enlightened Telecom regulatory Authority of India, a model of its kind.

But most important of all, as my story of the toddy –tapper confirms, is the issue of who carries these cellphones in today's India. For, the cell phones are now in the hands of people who would not have presumed, generation ago, to put themselves on those eight year long waiting lists. If you are chauffeur driven these days, you can be sure that your driver carries a cell phone. If you visit a friend in Delhi suburb, the istriwallah on the de streets – with his wooden cart, using a coal fired steam iron to iron clothes from the neighbourhood – carries a cellphone, to know which apartment needs his services. Farmers carry cellphones, just being able to call the nearest town to find out whether the market is open and what prices are being charged saves a farming family hours of fruitless walking. In Kerala, fisherfolk carry cellphones, so they can call in to the coastal towns after their catch, to know where they should sail to in order to obtain the best prices for their fish.

The cellphone is not a panacea, it will not single-handedly usher in the development that our country has been striving for since Independence. But it is making a huge difference. Above all it has empowered the Indian underclass in ways in which 45 years of talk about socialism singularly failed to do. In the new India, communications has become the great leveller.

1

(1) What is the purpose of writing this extract?   1
(2) What is the strange in the description of the istriwalla?   2
(3) How has communication become the great leveller?   2
(4) What are the other electronic devices that have played a key role in changing our society? How?   2
(5) Do as directed:
(i) Communication has become a great leveller. (Make it a complex sentence)   1
(ii) In the new India, communication has become a great <u>leveller.</u> (Use the verb form of the underlined word)   1

(iii) It is making a huge difference. (Use present perfect continuous tense)   1
(6) Give meanings of –
(a) panacea   (b) usher   1

(B) Note making :

            (4)

Read the following extract and complete the table given below:
     The Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) was passed in 2005 with an aim to enhance the livelihood security of people in rural areas. It guaranteed 100 days of wage employment to unskilled manual workers.
     A unique survey of over 20,000 rural household came up with some interesting results comparing the facts in 2004-05 to those in 2011-12. The participations of men and women in 2004-05 was 12.2% and 8.8% respectively which rose up to 23.4% and 17.7% respectively which can be regarded as a considerable growth.
     The percentage of MGNREGA participants taking loans from private money – lenders sharply from 47.9% in 2004-05 to 26.7 % in 2011-12. The scheme acted considerably in reducing the reliance of people on private money- lenders.
     Nearly 34.2% participants borrowed from formal sources such as banks and self- help groups as compared to 23.9% in 2004-05. MGNREGA's focus on direct payment to participants through banks may account for this improvement.
     The average annual interest paid by the participants fell sharply from 38.5 % in 2004-05 to 29.6% in 2011-12. This is indicative of their shifts from paying higher interests to money-lenders.
     The poverty ratio in 2004-05 was 52.2%. By 2011-12, it dropped to 31.9% . This clearly proves the fact that MGNREGA fared well in the first decade.

<center>MGNREGA FARED WELL</center>

- Passed in 2005

Q.3.(A) Read the following extract and answer the questions given below: (11)

Newspapers, especially of the popular variety, aim to do two things: to inform and to entertain. Entertainment may be principally found in the centre pages of newspaper, in some of the feature articles and some local news stories. The principal aim of the short news report on the front pages is to inform.

Most newspapers are published daily and the news reporters must make sure that they have up to the minute news. In their news report they will aim to create a sense of immediacy, to convey the impression that they have rushed the news to the reader and 'that the information contained in the very latest.'

Reporters also wish to create a sense of authenticity, that is, that their news is accurate and genuine. They may thus refer to their sources, to the spokesmen who informed them, perhaps quoting their very words to show that what has been produced is the 'real' news.

Just as reporters appear to be in a hurry to find out and then retell their facts too so the readers of the daily newspaper are often in a hurry, trying to read as much of the news as possible before rushing off to work. This is perhaps what dictates one very common format for news reports. According to this format, the first paragraph or two of the news report contains most of the points of the story, in a condensed or summary form. The following paragraphs go over all the main points again but this time adding more details. Thus the reader who is in a hurry can get main idea of the story by reading just initial paragraphs. The editor of the paper also benefits from this format, for if he or she runs out of space in the paper, some of the last paragraphs of the story can be deleted without too much harm.

(1) What is the theme of this extract?   1
(2) What is the purpose of the newspaper?   2
(3) Why do the reporters refer to their sources? What does the first paragraph of news contain?   2
(4) What according to you are the advantages of reading the newspaper daily?   2
(5) Do as directed:
(i) Most newspapers are published daily. (Change the voice)   1
(ii) The reader who is in a hurry can get the main idea of story by reading just initial paragraphs. (Rewrite as simple sentence)   1
(iii) Reporters also wish to create a sense of authenticity. (Rewrite as a rhetorical question)   1
(6) Write the anonyms of:
(a) popular   (b) condensed   1

(B) Summary:
Write a summary of the above extract with the help of the points given below and suggest a suitable title: (4)

Points: Aim………… up to the minute news………create a sense of authenticity…..format of newspaper.

Q.4   **Compréhension:** {10}
Lisez le texte qui suit et répondez aux questions en français par des phrases complètes:

Nous nous promenions un matin, Alphonse, Allais et moi, sur la route d' Honfleur a Pont-Audemer. Nous passions devant la gare de Saint – Sauveur une petite gare minuscule et coquette. Un train s' y arrêtait le matin, un autre train, peut-être le même, venant en sens (direction) inverse, s'y arrêtait le soir.
- Allons dire bonjour a ce chef de gare qui doit être bien seul, me dit-il.
- Vous le connaissez?
- Pas du tout.
 Nous sommes entrés. Un homme était là, tout seul, en effect, qui se promenait sur le quai, les mains derrière le dos. Nous sommes allés vers lui.
- Vous êtes le chef de gare, monsieur? Lui dit Allais.
- Parfaitement, monsieur.
- Eh bien je vous fais tous mes compliments, vous avez une gare charmante....charmante, charmante... mais comme elle est mal placée. Si vous aviez cela à Paris feriez utt argent fou!

(A)   **Questions:** (3)

       (1) Comment s' appellant les deux amis?
       (2) Combien de trains s' arrêtent – ils à la gare par jour?
       (3) Décrivez la gare.
