Q1 (A) Read the following extract and solve the activities as per the instruction. 12  
A1. Sequence - Put the given sentences in correct sequence. 2

- Reuben hid the tin can beneath a pile of grass.
- Reuben wandered through the town in search of sacks and sold them.
- Reuben saw the gift and was very excited to get it for his mother.
- Reuben opened the shop door and pleaded the shopkeeper

In 1945 in Bay Roberts, Canada, a 12-year-old boy saw something in a shop window that set his heart racing. But the price – five dollars – was far beyond Reuben Earle's means. Five dollars would buy almost a week's groceries for his family.

Reuben couldn't ask his father for the money. Everything Mark Earle made fishing, Reuben's mother, Dora, stretched like elastic to feed and clothe their five children.

Nevertheless, he opened the shop's weathered door and went inside. Standing proud and straight in his flour-sack shirt and washed out trousers, he told the shopkeeper what he wanted, adding, "But I don't have the money now. Can you please hold it for me?"

"I will try," the shopkeeper smiled. "Folks around here don't usually have that kind of money to spend on things. It should keep for a while."

Reuben respectfully touched his worn cap and walked out into the May sunlight. The bay rippled in a freshening wind that ruffled his short hair. There was purpose in his loping stride. He would raise the five dollars and not tell anybody.

Hearing the sound of hammering from a side street, Reuben had an idea.

He ran towards the sound and stopped at a construction site. People built their own homes in Bay Roberts, using nails purchased in burlap sacks from a local factory. Sometimes the sacks were discarded in the flurry of building, and Reuben knew he could sell them back to the factory for five cents apiece.

That day he found two sacks, which he took to the rambling wooden factory and sold to the man in charge of packing nails. The boy's hand tightly clutched the small five-cent pieces as he ran the two kilometres home.

Near his house stood the ancient barn that housed the family's goats and chickens. Reuben found a rusty baking-soda tin and dropped his coins inside. Then he climbed into the loft of the barn and hid the can beneath a pile of sweet-smelling hay.

It was supper time when Reuben got home. His father sat at the big kitchen table, working on a fishing net. Dora was at the black kitchen range, ready to serve dinner as Reuben took his place at the table.

He looked at his mother and smiled. Sunlight from the window gilded her shoulder-length blond hair. Five foot three, slim and beautiful, she was the centre of the home, the glue that held it together.

**Q 2.A Read the following extract and complete the activities given below.**

The titanic, in its watery grave, is a great museum of human history and is at risk of being lost forever because of curious voyagers and treasure hunters, fears Bob Ballard, who first discovered the remains of the iconic ship in 1985. Famous for discovering the great ship, Ballard is a former US Navy Officer and a professor of oceanography.

"Titanic is a museum of human history without door and guard. I am deeply concerned about not only the Titanic but all the ancient history that is now at risk. If we cannot save this iconic ship, then there is very little hope we can save ancient ships. The world should realize that you don't have to go down and take everything and you do not have to do a treasure hunt. This is a common heritage of all of us and if we really want to take steps to preserve human history in the ocean, we need to start with Titanic," Ballard said in a telephonic interview from London.

Ballard, as part of a tie-up, is presenting a documentary called "Save the Titanic" on the 100th anniversary of the sinking of the great ship – April 15, 1912. The ship and her fate continue to fascinate, largely because of the horror that took place that night, with 1,522 passengers and crew losing their lives.

Talking about his discovery, which came after great research and 75 years later, Ballard, says it was a sombre moment when they first spotted the boiler of the Titanic. "In the 90s, advanced technology gave us double diving capabilities in the Atlantic Ocean. I knew that the Titanic was sitting at almost 12,000 feet. What led me to her discovery was a simple technique that I followed. We decided to look for the debris trail instead of the ship".

Ballard says the ship, if preserved well and not subjected to constant submarine journeys, will last for a long time on the Atlantic floor. "The deep sea, because of its darkness, its cold temperatures and its great pressure, create a high state of preservation. With a little caution, we can protect the Titanic for future generations to visit."

**A1. On the basis of your reading of the passage, answer the following questions by choosing the best of the given choices.**

Q. 3. Read the following extract and complete the activities given below -

8

Old women do not fly on magic wands  
nor make obscure prophecies  
from ominous forests.  
They just sit on vacant park benches  
in the quiet evenings,  
call doves by their names  
and charm them with grains of maize.

Or, trembling like waves  
they stand in endless queues in  
government hospitals  
settle like sterile clouds  
in post offices awaiting mail  
from their sons abroad,  
long ago dead.

They whisper like drizzles  
as they roam the streets  
with a lost gaze as though  
something they had thrown up  
never returned to earth.

They shiver like December nights  
in their dreamless sleep  
on shop verandas.

There are swings still  
in their half-blind eyes,  
lilies and Christmases  
in their failing memory.  
There is one folktale  
for each wrinkle on their skin.

All dawns pass  
leaving them in the dark .  
They do not fear death,  
they died long ago.

**Q 4. Read the following extract and complete the given activities.**

The four of us drove out to Coney Island. Roma was easy to talk to, easy to be with. Turned out she was wary of blind dates too! We were both just doing our friends a favor. We took a stroll on the boardwalk, enjoying the salty Atlantic breeze, and then had dinner by the shore. I couldn't remember having a better time. We piled back into Sid's car, Roma and I sharing the backseat. As European Jews who had survived the war, we were aware that much had been left unsaid between us. She broached the subject, "Where were you during the war?" she asked softly.

"The camps," I said the terrible memories still vivid, the irreparable loss. I had tried to forget. But you can never forget.

She nodded. "My family was hiding on a farm in Germany, not far from Berlin," she told me. "My father knew a priest, and he got us Aryan papers." I imagined how she must have suffered too, fear, a constant companion. And yet here we were, both survivors, in a new world.

'There was a camp next to the farm.' Roma continued. "I saw a boy there and I would throw him apples every day."

Il y a 11 jours fériés par an en France. Parmi (amongst) eux, Noël et le jour de l'an sont les plus célèbres. Mais il y a aussi quelques fêtes où il n'y a pas de congés. Les jeunes aujourd'hui fêtent beaucoup de fêtes comme St. Valentin et la fête de la musique. Il y a quelques fêtes, fêtées le dimanche – la fête des Mères, la fête des Pères, la fête des Rois. C'est au X<sup>VII</sup><sup>e</sup> siècle que Napoléon Bonaparte, Empereur de la France, a l'idée de la fête des mères. Cette fête devient officielle en 1929 et populaire après la II<sup>e</sup> Guerre mondiale (World War). En 1950, L'Etat français introduit une loi pour cette fête. Elle a lieu le dernier dimanche du mois de mai. Pour cette occasion, dans les écoles, les enfants fabriquent de petits cadeaux qu'ils offrent à leur maman: fleurs en papier, dessins, cartes..... Mais la fête des mères est d'abord une fête familiale. Le père et les enfants achètent ensemble un cadeau à la mère de la famille. La fête des mères devient de plus en plus commerciale. Du début du mois de mai, des cadeaux et des cartes de vœux (wishes) apparaissent dans les magasins pour rappeler (to remind) à chacun (each one) qu'il doit acheter son cadeau.

On peut se débrouiller tout seul parce que dans chaque station il y a des plans du métro qui indiquent la route. D'autres comme Châtelet, sont immenses et pleines d' animation. On voit rarement un contrôleur, mais il faut passer le billet dans un appareil magnétique avant d' entrer sur le quai. बंगल्याच्या आजूबाजूला चक्क झाडीबिडी. बंगला आतल्या बाजूला असल्याने वाहतुकीचा आवाज शून्य ! अभ्यासात अडथळा आलाच, तर तो पक्ष्यांच्या किलबिलाटांचे काय तो येणार.
