#### (21/2 Hours)

[Total Marks: 75

N. B.:	(1) All	questions	are	compulsory
n 40 mm 44	1 ~ / ~ ~ ~	of our over over	A44 44	POWER PROPERTY

- (2) Make suitable assumptions wherever necessary and state the assumptions made.
- (3) Answers to the same question must be written together.
- (4) Numbers to the right indicate marks.
- (5) Draw neat labeled diagrams wherever necessary.
- (6) Use of Non-programmable calculators is allowed.

#### 1. Attempt any three of the following:

15

- a. Explain 3D's (Defense, Detection, and Deterrence) aspects of security can be applied to any situation.
- b. Explain various Application-layer attacks which include any exploit directed at the applications running on top of the OSI protocol stack.
- c. Write a short note on CIA Triad Model with reference to Security in Computing.
- d. With the help of diagram, explain how Onion Defence Model is better than other Model for security.
- e. What is meant by Zone of Trust? Explain the importance of Zone of Trust for communication through with diagram.
- f. What are the various countermeasures that, anyone can implement to minimize the risk of a successful attack?

#### 2. Attempt any three of the following:

15

- a. Explain different types of Authentication in detail.
- b. How Kerberos Authentication Process takes place? Explain each step with diagram.
- c. Write a short note on Certificate-Based Authentication.
- d. What is meant by Extensible Authentication Protocol (EAP)? Explain its different types.
- e. Explain role of PKI (Public Key Infrastructure) in Security in Computing and Structure and Function of PKI.
- f. "Each layer of security is designed for a specific purpose and can be used to provide authorization rules". Explain this statement with reference to Database Security Layers and its types.

#### 3. Attempt any three of the following:

15

- a. Explain different layers of two-tier network fundamentals.
- b. With reference to OSI model in which layer does Router operate? Explain the working of Routing Protocols.
- c. Write a short note on different generation of Firewalls.
- Explain role of ICMP, SNMP and ECHO in network hardening.
- e. With the help of diagram, explain working of Bluetooth Protocol Stack.
- f. What is meant by Wireless Intrusion Detection and Prevention? Explain working of it.

[Contd...

# Paper / Subject Code: 88702 / Security in Computing

	(2% Hours)
4.	Attempt any three of the following:
a	Write a short note on two types of IDS Generation in brief.
b	What is Private Branch Exchange (PBX)? Explain how it can be secured
C	How Mandatory Access Control Lists (MACL) differ from Discretionary access control lists (DACLs)? Explain.
d	Explain working of Riba and Clark Wilson Classic Security Models.
e	What is meant by Security Reference Monitor? Explain Windows Security Reference

Monitor in detail.

f Explain main problems of TCP/IP's lack of security.

	Attempt mer thirty within followings
5.	Attempt any three of the following:
a.	What is meant by Hypervisor machine? Explain Why it is necessary to protect unit
b.	machine.  Write a short note on Security Benefits of Cloud Computing.
c.	With the help of diagram explain the concept of Secure development lifecycle in Agire
d.	Explain phishing mechanism and 3D's aspects of security with reference to it.  Give a reason in brief, why it is mandatory to update application patches?
e.	Entire regions machanisms for easily undating applications.
f.	Explain various incertains for web application security to be considered with reference to Security in Computing

# Paper / Subject Code: 88701 / Quality Assurance

10	1	1	WW				. 3
(2	A)	-	1-4	0	81	Bell	8
dat	1	Z	11	v	u	2.0	,
			100	1			Ċ4

[Total Marks: 75]

	1	I. B.: (1) All questions are compulsory.	
		(2) Make suitable assumptions wherever necessary and state the assumptions mad	e.
		(3) Answers to the same question must be written together.	
		(4) Numbers to the right indicate marks.	
		(5) Draw neat labeled diagrams wherever necessary.	
		(6) Use of Non-programmable calculators is allowed.	
			1
	1.	Attempt any three of the following:	1
	a.	Explain the principles of TQM in detail.	-
	b.	What do you mean by quality? Explain customer's view on quality.	
	c.	Write a short note on continual improvement cycle.	
	d.	What are the constraints of product quality assessment?	100
	e.	Explain relationship between quality and productivity.	train.
	f.	Explain quality assurance elements in detail.	
	2.	Attempt any three of the following:	15
	a.	What is a defect? What are the categories of defects?	N
	Ъ.	Explain the basic principles on which the testing is based.	. 2
	C.	Write a short note on mutation testing.	,
	d.	Explain the process of developing by test methodology.	
	e.	Explain types of prototyping software development model in detail.	
4	f.	What are the challenges faced by tester?	
	3.	Attempt any three of the following:	15
	a.	What do you mean by random testing? Explain its advantages and disadvantages in	
100		detail.	
	b.	Explain equivalence class testing concept with example and its types.	
	C.	What do you mean by decision table? Explain with examples.	
	d.	What is path testing? What are the features of path testing?	
	e.	Write a short note on slice based testing.	
	f.	What do you mean by define/use testing? Explain du and de path.	
	4.	Attempt any three of the following:	15
	a	What are the different entities involved in verification?	
	Ь	Explain the concept of validation workbench in detail.	
	C	Explain testing during requirement stage.	
	d	Explain the V model for software,	
	6	What are the critical roles and responsibilities in verification and validation?	
	1	Explain types of reviews on the basis of stage/phase during development life cycle.	

[Contd...

- Attempt any three of the following: 5.
- Explain the different stages in requirement based testing. a.
- Describe code review and unit testing process. b.
- Write short notes on stress testing and recovery testing. C.
- Explain the concept of critical path analysis (CPA) in detail. d.
- Why do software organizations use commercially of the shelf software (COTS)? e. Explain COTS features in detail.
- What is regression testing? Explain its importance in detail. f.

### Paper / Subject Code: 88703 / Business Intellitgence

N. B.: (1) All questions are compulsory.  (2) Make suitable assumptions wherever necessary and state the assumptions made.  (3) Answers to the same question must be written together.  (4) Numbers to the right indicate marks.  (5) Draw neat labeled diagrams wherever necessary.  (6) Use of Non-programmable calculators is allowed.  1. Attempt any three of the following:  a. What is the difference between data, information and knowledge?  b. Draw and explain architecture of business intelligence.  c. Describe the extended architecture of decision support systems.  c. Explain structured, unstructured and semi-structured decisions.  f. What are the factors that affect rational choice of the decision-making?  2. Attempt any three of the following:  a. What is a model? Describe the phases in a development of the mathematical model for decision making.  b. Explain predictive and optimization models.  Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  3. Attempt any three of the following:  write short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write short note on confusion matrix.  b. What is classification? Write a short note on Bayesian Method of classification.  Write short note on foliance in a cycle of relational marketing.  Draw and explain a structure of classification tree with a suitable example.  Explain agilomerative hierarchical clustering method.  4. Attempt any three of the following:  a Explain alifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short			200
(2) Make suitable assumptions wherever necessary and state the assumptions made. (3) Answers to the same question must be written together. (4) Numbers to the right indicate marks. (5) Draw neat labeled diagrams wherever necessary. (6) Use of Non-programmable calculators is allowed.  1. Attempt any three of the following:  a. What is the difference between data, information and knowledge? b. Draw and explain architecture of business intelligence. c. Describe different phases in the development of a decision support system (DSS). d. Describe the extended architecture of decision support systems. c. Explain structured, unstructured and semi-structured decisions. f. What are the factors that affect rational choice of the decision-making?  2. Attempt any three of the following: a. What is a model? Describe the phases in a development of the mathematical model for decision making. b. Explain predictive and optimization models. c. Describe categorical and numerical attributes with example for each one of them. d. Describe different transformation techniques for standardization (normalization). write short note on principal component analysis (PCA). f. List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on logistic regression used for prediction. write a short note on logistic regression used for prediction. write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Explain a lifetime of a customer in a cycle of relational marketing.  What do you und		(2½ Hours)	
(2) Make suitable assumptions wherever necessary and state the assumptions made. (3) Answers to the same question must be written together. (4) Numbers to the right indicate marks. Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	1.	Attempt any three of the following:	1
b. Draw and explain architecture of business intelligence.  C. Describe different phases in the development of a decision support system (DSS).  Describe the extended architecture of decision support systems.  Explain structured, unstructured and semi-structured decisions.  What are the factors that affect rational choice of the decision-making?  2. Attempt any three of the following:  a. What is a model? Describe the phases in a development of the mathematical model for decision making.  Explain predictive and optimization models.  Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  3. Attempt any three of the following:  a. Write short note on confusion matrix.  What is classification? Write a short note on Bayesian Method of classification.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a many three of the following:  Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	a.	What is the difference between data, information and knowledge?	
Describe different phases in the development of a decision support system (DSS).  Describe the extended architecture of decision support systems.  Explain structured, unstructured and semi-structured decisions.  What are the factors that affect rational choice of the decision-making?  2. Attempt any three of the following:  a. What is a model? Describe the phases in a development of the mathematical model for decision making.  b. Explain predictive and optimization models.  Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  e. Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  3. Attempt any three of the following:  a. Write short note on confusion matrix.  b. What is classification? Write a short note on Bayesian Method of classification.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  Write a short note on logistic regression used for prediction.  4. Attempt any three of the following:  Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	b.	Draw and explain architecture of business intelligence.	
c. Explain structured, unstructured and semi-structured decisions.  f. What are the factors that affect rational choice of the decision-making?  2. Attempt any three of the following: a. What is a model? Describe the phases in a development of the mathematical model for decision making. b. Explain predictive and optimization models. c. Describe categorical and numerical attributes with example for each one of them. d. Describe different transformation techniques for standardization (normalization).  e. Write short note on principal component analysis (PCA). f. List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification.  Write a short note on logistic regression used for prediction. d. Write when any algorithm for clustering. Draw and explain a structure of classification tree with a suitable example. f. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. What do you understand by market-basket analysis? What is supply chain management? Give an example of global supply chain. List and explain basic principles of revenue management? Explain data envelopment analysis (DEA)? How efficiency is measured? Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	c.	Describe different phases in the development of a decision support system (DSS)	
Explain structured, unstructured and semi-structured decisions.  What are the factors that affect rational choice of the decision-making?  Attempt any three of the following:  Describe and optimization models.  Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  Attempt any three of the following:  Write short note on confusion matrix.  What is classification? Write a short note on Bayesian Method of classification.  Write k-means algorithm for clustering.  Draw and explain a structure of classification tree with a suitable example.  Explain agglomerative hierarchical clustering method.  Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.	d.	Describe the extended architecture of decision support systems.	:
2. Attempt any three of the following: a. What is a model? Describe the phases in a development of the mathematical model for decision making. b. Explain predictive and optimization models. c. Describe categorical and numerical attributes with example for each one of them. d. Describe different transformation techniques for standardization (normalization). e. Write short note on principal component analysis (PCA). f. List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. c. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. c. Draw and explain a structure of classification tree with a suitable example. f. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. b What do you understand by market-basket analysis? What is supply chain management? Give an example of global supply chain. c. List and explain basic principles of revenue management? Explain data envelopment analysis (DEA)? How efficiency is measured? b Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?		Explain structured, unstructured and semi-structured decisions.	
a. What is a model? Describe the phases in a development of the mathematical model for decision making.  b. Explain predictive and optimization models.  c. Describe categorical and numerical attributes with example for each one of them.  d. Describe different transformation techniques for standardization (normalization).  e. Write short note on principal component analysis (PCA).  f. List and explain various applications of data mining.  3. Attempt any three of the following:  a. Write short note on confusion matrix.  b. What is classification? Write a short note on Bayesian Method of classification.  d. Write a short note on logistic regression used for prediction.  d. Write k-means algorithm for clustering.  e. Draw and explain a structure of classification tree with a suitable example.  f. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  a Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  c What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	Í.	What are the factors that affect rational choice of the decision-making?	Š.
a. What is a model? Describe the phases in a development of the mathematical model for decision making.  b. Explain predictive and optimization models.  C. Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  e. Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  3. Attempt any three of the following:  a. Write short note on confusion matrix.  b. What is classification? Write a short note on Bayesian Method of classification.  Write a short note on logistic regression used for prediction.  d. Write k-means algorithm for clustering.  Draw and explain a structure of classification tree with a suitable example.  Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	2.	Attempt any three of the following:	15
b. Explain predictive and optimization models. c. Describe categorical and numerical attributes with example for each one of them. d. Describe different transformation techniques for standardization (normalization). Write short note on principal component analysis (PCA). List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. d. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. Draw and explain a structure of classification tree with a suitable example. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. b What do you understand by market-basket analysis? c What is supply chain management? Give an example of global supply chain. List and explain basic principles of revenue management? Explain data envelopment analysis (DEA)? How efficiency is measured? f Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	a.	What is a model? Describe the phases in a development of the mathematical model for	
c. Describe categorical and numerical attributes with example for each one of them.  Describe different transformation techniques for standardization (normalization).  Write short note on principal component analysis (PCA).  List and explain various applications of data mining.  3. Attempt any three of the following:  a. Write short note on confusion matrix.  What is classification? Write a short note on Bayesian Method of classification.  Write a short note on logistic regression used for prediction.  Write k-means algorithm for clustering.  Draw and explain a structure of classification tree with a suitable example.  Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	b.	Explain predictive and optimization models.	
d. Describe different transformation techniques for standardization (normalization).  Write short note on principal component analysis (PCA). List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. c. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. e. Draw and explain a structure of classification tree with a suitable example. f. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. b What do you understand by market-basket analysis? c What is supply chain management? Give an example of global supply chain. d. List and explain basic principles of revenue management? e Explain data envelopment analysis (DEA)? How efficiency is measured? f Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	C.	Describe categorical and numerical attributes with example for each one of them.	
f. List and explain various applications of data mining.  3. Attempt any three of the following: a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. C. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. e. Draw and explain a structure of classification tree with a suitable example. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. What do you understand by market-basket analysis? What is supply chain management? Give an example of global supply chain. List and explain basic principles of revenue management? Explain data envelopment analysis (DEA)? How efficiency is measured? Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	d.	Describe different transformation techniques for standardization (normalization).	
3. Attempt any three of the following:  a. Write short note on confusion matrix.  b. What is classification? Write a short note on Bayesian Method of classification.  c. Write a short note on logistic regression used for prediction.  d. Write k-means algorithm for clustering.  e. Draw and explain a structure of classification tree with a suitable example.  Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?		Write short note on principal component analysis (PCA).	
a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. C. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. e. Draw and explain a structure of classification tree with a suitable example. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. b What do you understand by market-basket analysis? c What is supply chain management? Give an example of global supply chain. d List and explain basic principles of revenue management? e Explain data envelopment analysis (DEA)? How efficiency is measured? f Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	f.	List and explain various applications of data mining.	
a. Write short note on confusion matrix. b. What is classification? Write a short note on Bayesian Method of classification. C. Write a short note on logistic regression used for prediction. d. Write k-means algorithm for clustering. e. Draw and explain a structure of classification tree with a suitable example. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following: a Explain a lifetime of a customer in a cycle of relational marketing. b What do you understand by market-basket analysis? c What is supply chain management? Give an example of global supply chain. d List and explain basic principles of revenue management? e Explain data envelopment analysis (DEA)? How efficiency is measured? f Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?			
<ul> <li>b. What is classification? Write a short note on Bayesian Method of classification.</li> <li>c. Write a short note on logistic regression used for prediction.</li> <li>d. Write k-means algorithm for clustering.</li> <li>e. Draw and explain a structure of classification tree with a suitable example.</li> <li>f. Explain agglomerative hierarchical clustering method.</li> <li>4. Attempt any three of the following: <ul> <li>a Explain a lifetime of a customer in a cycle of relational marketing.</li> <li>b What do you understand by market-basket analysis?</li> <li>c What is supply chain management? Give an example of global supply chain.</li> <li>d List and explain basic principles of revenue management?</li> <li>e Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>f Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> </ul> </li> <li>5. Attempt any three of the following: <ul> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>			15
<ul> <li>c. Write a short note on logistic regression used for prediction.</li> <li>d. Write k-means algorithm for clustering.</li> <li>e. Draw and explain a structure of classification tree with a suitable example.</li> <li>f. Explain agglomerative hierarchical clustering method.</li> <li>4. Attempt any three of the following: <ul> <li>a Explain a lifetime of a customer in a cycle of relational marketing.</li> <li>b What do you understand by market-basket analysis?</li> <li>c What is supply chain management? Give an example of global supply chain.</li> <li>d List and explain basic principles of revenue management?</li> <li>e Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>f Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> </ul> </li> <li>5. Attempt any three of the following: <ul> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>	-		
<ul> <li>d. Write k-means algorithm for clustering.</li> <li>e. Draw and explain a structure of classification tree with a suitable example.</li> <li>f. Explain agglomerative hierarchical clustering method.</li> <li>4. Attempt any three of the following: <ul> <li>a Explain a lifetime of a customer in a cycle of relational marketing.</li> <li>b What do you understand by market-basket analysis?</li> <li>c What is supply chain management? Give an example of global supply chain.</li> <li>d List and explain basic principles of revenue management?</li> <li>e Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>f Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> </ul> </li> <li>5. Attempt any three of the following: <ul> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>		what is classification? Write a short note on Bayesian Method of classification.	
<ul> <li>e. Draw and explain a structure of classification tree with a suitable example.</li> <li>f. Explain agglomerative hierarchical clustering method.</li> <li>4. Attempt <u>any three</u> of the following: <ul> <li>Explain a lifetime of a customer in a cycle of relational marketing.</li> <li>What do you understand by market-basket analysis?</li> <li>What is supply chain management? Give an example of global supply chain.</li> <li>List and explain basic principles of revenue management?</li> <li>Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> </ul> </li> <li>5. Attempt <u>any three</u> of the following: <ul> <li>What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>		Write k means algorithm for abstrains	
f. Explain agglomerative hierarchical clustering method.  4. Attempt any three of the following:  a Explain a lifetime of a customer in a cycle of relational marketing.  b What do you understand by market-basket analysis?  c What is supply chain management? Give an example of global supply chain.  d List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?			
<ul> <li>4. Attempt any three of the following: <ul> <li>Explain a lifetime of a customer in a cycle of relational marketing.</li> <li>What do you understand by market-basket analysis?</li> <li>What is supply chain management? Give an example of global supply chain.</li> <li>List and explain basic principles of revenue management?</li> <li>Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> </ul> </li> <li>5. Attempt any three of the following: <ul> <li>What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>		Explain agglomerative hierarchical clustering method	
Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	1.	Explain aggreenerative ineratement clustering memod.	
Explain a lifetime of a customer in a cycle of relational marketing.  What do you understand by market-basket analysis?  What is supply chain management? Give an example of global supply chain.  List and explain basic principles of revenue management?  Explain data envelopment analysis (DEA)? How efficiency is measured?  Write short note on CCR (Charnes-Cooper-Rhodes) model.  Attempt any three of the following:  a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	4.	Attempt any three of the following:	15
<ul> <li>What do you understand by market-basket analysis?</li> <li>What is supply chain management? Give an example of global supply chain.</li> <li>List and explain basic principles of revenue management?</li> <li>Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> <li>Attempt <u>any three</u> of the following:</li> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul>			15
<ul> <li>What is supply chain management? Give an example of global supply chain.</li> <li>List and explain basic principles of revenue management?</li> <li>Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> <li>Attempt <u>any three</u> of the following:</li> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul>		What do you understand by market-basket analysis?	
d List and explain basic principles of revenue management? e Explain data envelopment analysis (DEA)? How efficiency is measured? f Write short note on CCR (Charnes-Cooper-Rhodes) model.  5. Attempt <u>any three</u> of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	C	What is supply chain management? Give an example of global supply chain	
<ul> <li>Explain data envelopment analysis (DEA)? How efficiency is measured?</li> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> <li>Attempt <u>any three</u> of the following:</li> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul>	d	List and explain basic principles of revenue management?	
<ul> <li>Write short note on CCR (Charnes-Cooper-Rhodes) model.</li> <li>Attempt <u>any three</u> of the following: <ul> <li>a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?</li> </ul> </li> </ul>	e	Explain data envelopment analysis (DEA)? How efficiency is measured?	
5. Attempt <u>any three</u> of the following: a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?		Write short note on CCR (Charnes-Cooper-Rhodes) model.	
a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?			
a. What are the differences between the process approach and the practice approach in a knowledge management system (KM)?	5.		15
b. How does Information Technology(IT) contribute to the management of knowledge?	a.	What are the differences between the process approach and the practice approach in a	
	b.	How does Information Technology(IT) contribute to the management of knowledge?	

C.

d.

e.

Describe different phases in the Knowledge Management Systems (KMS) cycle

Differentiate between conventional system and expert systems

Who is chief knowledge officer (CKO)? What are the responsibilities of the CKO?

What is expert system? How it is different from Decision Support System (DSS)?

#### (Time: 21/2 hours)

Total Marks: 75

iptions made.

N. B.:	(1)	All questions are compulsory.
	(2)	Make suitable assumptions wherever necessary and state the assum
		Answers to the same question must be written together.
		Numbers to the wight indicate moules

- (4) Numbers to the right indicate marks.
- (5) Draw neat labeled diagrams wherever necessary.
- (6) Use of Non-programmable calculators is allowed.

#### 1. Attempt any three of the following:

15

- a. Explain in brief about business processes.
- b. Write a short note on processes and functions across service lifecycle of ITSM.
- c. Explain type I and type III service providers in detail.
- d. Explain four P's of Service Strategy with a neat labelled diagram.
- e. How are markets defined in service strategy? Explain.
- f. What is risk? Explain the phases and different types of risk in detail.

#### 2. Attempt any three of the following:

15

- a. Write a short note on balanced service design.
- b. What is service design model? List and explain different aspects required during its assessments.
- c. Explain any six components of service availability management process.
- d. Explain service level management process in detail.
- e. Explain in detail supplier management process of service design.
- f. What are the challenges associated for achieving successful service design process? Explain in brief.

#### 3. Attempt any three of the following:

15

- a. Describe service transition. Explain its objectives, purpose and goal.
- b. How to align service transition plans with the business needs? Explain.
- c. What is Change? What are the different types of Changes? List and explain Seven R (7 R's) of ITIL Change management.
- d. Explain in detail service validation and testing process.
- e. Explain the factors affecting the approach to service transition.
- f. Write a detail short note on critical success factors of service transition phase

#### 4. Attempt any three of the following:

15

- a. Define service operation. Explain the principles of service operation stage.
- b. State reasons why service operation staff should be involved at service design and transition stage?
- c. What are different types of meetings conducted in organization as mode of communication? Explain.
- d. Write short note on Incident Management Lifecycle activities.
- e. Explain in detail access management process.
- f. List and explain the challenges and risks in service operation phase.

[Contd...

# Paper / Subject Code: 88706 / I. T. Service Management

5. Attempt any three of the following:

a. Explain benchmarking in CSI with respect to its procedure, cost and value to decorganization.

b. Explain the RACI model.

c. With a neat labeled diagram explain seven steps improvement process of CS

d. Write short note on CSI inputs and outputs for the various stages.

e. Explain the tools used to support CSI activities.

f. What are the factors to be considered when preparing a communication plan?

# Paper / Subject Code: 88707 / Cyber Laws

# (2½ Hours)

[Total Marks: 75]

N D	.: (1) All questions are compulsory.	
N.B.	(2) Mala gritable assumptions wherever housely that	
	(3) Answers to the same question must be written together.	
	(4) Numbers to the <u>right</u> indicate <u>marks</u> .	10
	(5) Description and labeled diagrams wherever necessary.	10

	(6) Use of Non-programmable	
	the following:	15
1.	Attempt <u>any three</u> of the following: What is hacker? What are the different types of hackers?	7
a.	Write a short note on arrest but no punishment.	
b.	Write a short note on arrest out no punished	
C.	Explain Non-cognizable offense.	*
d.	Explain cyber-Pornography.  Why there is necessity of arrest without warrant from any place, public or otherwise?  Why there is necessity of arrest without warrant from any place, public or otherwise?	
e.	Why there is necessity of affect without warrant warrant without warrant warra	
f.	What is cybercrime? How the classification of 5,500	- 0
	Cat - Callerings	15
2.	Explain any three of the following:	
a.	The elements of E-contract. The jurisdiction disputes w.r.t the intent in the United State of America.	
b.	The jurisdiction disputes w.r.t the intent in the objects	
c.	Shrink and wrap contracts.	
d.	The Jurisdiction and The Information Technology Act, 2000.	
e. 🦿	The validity of the present law of Jurisdiction.	
f.	The exclusion clauses in contracts.	
3	C. Harrison	15
3.	Attempt <u>any three</u> of the following:  Explain the legislative and other innovative moves against Cyber Squatting.	
a.	Explain the legislative and other filliovative moves as	
b	Write a short note on license of copyright.	
C.	Explain meta tagging.	
d.	Explain linking.	
e.	Explain computer software piracy.	
f.	Explain Framing.	
		15
4.	Attempt <u>any three</u> of the following:  Explain commencement of operation by licensed certifying authorities.	
a.	Explain commencement of operation by hechieu contributes	
b.	Explain commencement of operation of perturbations authorities.  Explain the recognition of foreign certifying authorities.  Explain the recognition of foreign certifying authorities.	
C.	Explain the recognition of foreign certifying authorities.  Explain certifying authorities and their liability in the event of digital signature	
d.	Write a short note on The United Nations Model Tax Treaty.  Write a short note on The United Nations Model Tax Treaty.	
e.	Write a short note on the Impact of the Internet on Customer duties?  Write a short note on the Impact of the Internet on Customer duties?	
f.	Explain Taxation Policies in India.	
de la companya de la		15
5.	Attempt any three of the following:	
a.	What are the different types of Evidences?	
b.		
b.	Figure the other amendments in the indian Evidence Tree of	
d.	What are the objectives of Consumer Protection 110.	
е.	What is Complaint? Who can file a Complaint?	
f.	Explain the District forum.
